TO: Bladen County Water District Customers

The Live Oak Well has been repaired and is ready to be put back in service. The Bladen County Water District is planning to put this well in service on Thursday, June 13, 2019. While every effort will be made to keep the water as clear as possible during this transition, customers may experience some discoloration in the water. Customers are encouraged to limit use as much as possible and refrain from laundering white or light colored items. Your patience with us during this unforeseen incident is greatly appreciated.
